OPEN HOUSE: STUDIO PROJECTS

DECEMBER 14, 1985 (SATURDAY)

SCHOOL OF MUSIC BUILDING: ROOM 2062

AT I:00

assist the creation, the promotion and the diffusion of electroacoustic music.

troacoustic music. The diversification and vitality of electroacoustic music throughout the world, the increasing hybridization of production techniques – itself the fruit of musical research in both analog and digital domains and of the confrontation between musical thought and technological progress, the proliferation of cigital and hybrid instruments and compositional tools (synthesis programs, microprocessors, digital synthesizers, etc.) of high quality and modest price now found both in private and in institutional studios, the many functions of electroacoustic music and the dynamic relations which it maintains with other artistic media:

All these factors have prompted the
