

## MIDI Mapper in Kyma

- 1) Insert **MIDI Mapper** into the Signal Path to the right of any Sounds whose hot parameters you wish to rename.

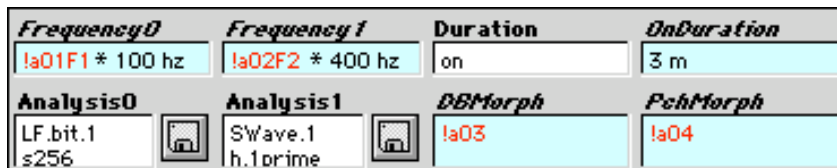

- 2) Set the values of the **MIDI Mapper** parameters to those shown below.

- 3) For MIDI polyphony, set the "Polyphony" value to the desired number of voices.

- 4) Use the new hot parameter names in the desired parameter fields, as shown below.

- 5) The new hot parameter names will override those in the **Global Map** and will appear alphabetically in the **Virtual Control Surface**, as shown below.
