

Composition: Electronic Media I

Sept. 7, 2005

Favorite Key Commands for Pro Tools

1. In the track controls window, holding down **option** while selecting a function, such as solo, mute, waveform, volume, will cause that function to be selected in all tracks.
2. In the edit window, typing **cmd]** will zoom out horizontally. Typing **cmd [** will zoom in horizontally.
3. To select an insertion point in the edit window, type * to select minutes in the counter. Type -> (the right arrow key) and <- (the left arrow key) to move among minutes:sections:milliseconds. Type in the desired values, then press **return**.
4. To audition a sound in the Audio Region List, press **option** and select that sound. A speaker icon will appear in place of the cursor and the sound will play.
