

Electronic Media II

Spring 2005

EMS Additive Synthesizer Mark II, with amplitude envelope control of each oscillator.

1. Below is the EMS Additive Synthesizer Mark II.

EMS Additive Synthesizer Mark II

- The oscilloscope and the signal meter have been removed.
- The *~ signal multiplier object for each oscillator has been replaced by a line~ object with a unique message box. These create a unique amplitude envelope for each oscillator.
- These messages are triggered by the “bang” button in the upper left corner.
- The bang button is triggered by any note of the keyboard.
