Send and Receive in Max/MSP

1. The patch below sends a bang or numbers from “send larry” to “receive larry”. Notice the absence of patch cords.

2. The patch below sends a bang or numbers from “s doug” to “r doug”. Notice that “send” is shortened to “s” and “receive” is shortened to “r”.

3. The patch below sends data from “s eddie” to a “r eddie” which is residing in sub-patch “p studio 2”.

4. In summary, s and r work anywhere in a patch and can reduce clutter.
