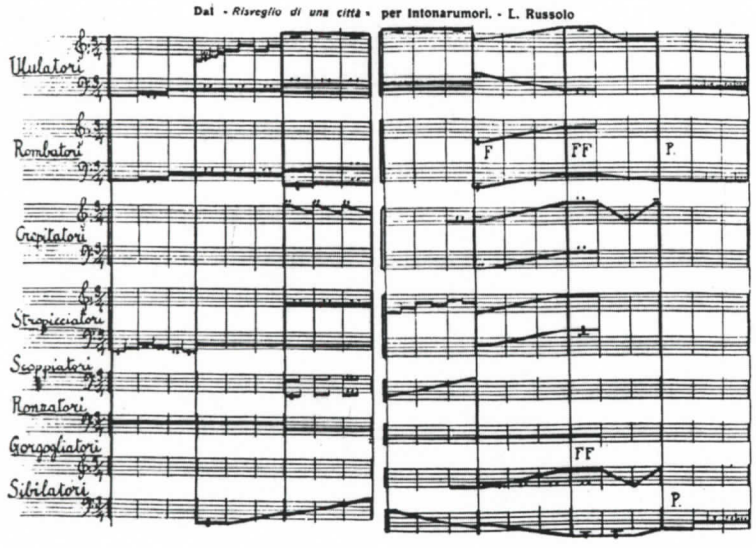

Fig. 39. Score for *Awakening of a City.*

So far, I and Piatti have invented and constructed 21 noise instruments. Studies and tests have already been made for many more, so that the orchestra of noise instruments will soon be enriched with new timbres and new families.

Here is a list of those already constructed:

3 HOWLERS (*Ululatori*)	1st: low	2nd: medium	3rd: high	
3 ROARERS (*Rombatori*)	1st: low	2nd: medium	3rd: high	
4 CRACKLERS (*Crepitatori*)	1st: low	2nd: medium	3rd: high	4th: very high
3 RUBBERS (*Stropicciatori*)	1st: low	2nd: medium	3rd: high	
2 BURSTERS (*Scoppiatori*)	1st: low	2nd: medium		
2 BURSTERS	Different from each other and from the preceding two			
2 GURGLERS (*Gorgoliatori*)	1st: low	2nd: medium		
1 LOW HUMMER (*Ronzatore*)				
1 LOW WHISTLER (*Sibilatore*)				

Externally, the noise instruments take the form of boxes of various sizes, usually constructed on a rectangular base. At the front end, a trumpet serves to collect and reinforce the noise-sound.
