

025:251 COMPOSITION: ELECTRONIC MEDIA II

Spring 2010

Max/MSP Tutorial #1.

1. Build a patch that lets the user open one aiff file, and play it with bang and metro.
2. Modify the patch so that three or more soundfiles can be played together. Record the output to a stereo aiff file.
3. Make sure everything is neat and aligned, with patch cords using right angles.
4. Make screen shots for students to download to their flash drives.
