Recording Soundfiles in Max/MSP

1. A patch for recording to a soundfile is shown below.

2. To record, do the following.

- a. Turn on the dac.
- b. Confirm that audio is reaching the meters.
- c. Click on "open". Name and save to the desired location.
- d. Turn the toggle to start recording.
- e. Turn off the toggle to stop recording.
- f. To make another soundfile, repeat all of the above steps.
- g. Note that after the toggle is turned off, the soundfile cannot be overwritten.
